

AIR ELIMINATORS FOR WATER SYSTEMS AE20 (Carbon Steel)

DESCRIPTION

The AE20 carbon steel air eliminator removes air from hot and superheated water systems and is also suitable for all liquids compatible with the construction, providing that their specific gravity is not less than 0,75Kg/dm³.

This ball float type automatic air eliminator can be used in combination with other air elimination and separation systems or directly applied at high points in the piping.

Connections are female screwed or flanged for horizontal or vertical installation

MAIN FEATURES

Corrosion resistant working parts.

Replaceable internal parts.

OPTIONS: Internal strainer (only on horizontal models).

USE: Cold, hot and superheated water systems.

AVAILABLE MODELS: AE 20-21

SIZES: DN ½" – 1", DN 15 to DN25.

CONNECTIONS: Female screwed ISO 7/1Rp(BS21).
Flanged EN 1092-1 PN40 or ANSI.
Special flanges upon request.

INSTALLATION Horizontal or vertical installation (on request). It must be installed with the float lever in horizontal plane, so that it rises and falls vertically. It should be installed at the points in the plant where the air tends to collect.

The drain should be piped to a safe position.

See IMI installation and maintenance instructions.

Capacities at a standard atmospheric pressure of 1bar and 20°C.

If the temperature differs from 15°C, the discharge capacity can be corrected by multiplying it by: $\frac{288}{273 + T}$,
where T is the actual temperature in °C.
